

Aishah Isap

Preston, UK [07450356859] | [aishahisap123@gmail.com] | [[PersonalWebsite](#)]

PERSONAL PROFILE

Motivated student with a strong interest in technology, software development and cyber security, currently studying A Levels in Mathematics, Statistics and Computer Science. Achieved an A* in a CII Sec Cyber Security EPQ, demonstrating strong research, analytical and problem-solving abilities.

Experienced in programming, web development and independent technical projects, including developing an interactive arcade website using HTML, CSS and JavaScript, achieving full marks in Computer Science coursework. Additional experience includes game development using Godot, developing a personal portfolio website and working on a personal e-reader project.

Strong teamwork, communication and leadership skills developed through Hack Club, where I help organise coding events, support workshops and assist participants with technical challenges. Industry experience with BAE Systems, Jaguar Land Rover and Wilmott Dixon has provided insight into professional technology and engineering environments. Keen to develop my technical and professional skills through a Technology Degree Apprenticeship while contributing to real-world projects.

EDUCATION

Cardinal Newman College, Preston

September 2024 – June 2026

A Levels:

- Mathematics — **B**
- Statistics — **A**
- Computer Science — **B**

Extended Project Qualification:

- CII Sec Cyber Security EPQ — **A***

Preston Muslim Girls High School, Preston

September 2019 – June 2024

GCSEs: 8 subjects at grades 6–8, including:

- Mathematics — **8**
- Chemistry — **8**
- Physics — **8**
- Geography — **8**
- Religious Studies — **8**

- Biology — 7
 - Computer Science — 7
 - French — 6
 - English Language — 6
 - English Literature — 6
-

TECHNICAL SKILLS

Programming: Python, C#, HTML, CSS, JavaScript

Development: Web development, object-oriented programming, debugging, testing, APIs and libraries

Cyber Security: Cyber security research, system security concepts, threat awareness and risk-related concepts

Game Development: Godot Engine

Hardware: Introductory PCB development and practical hardware projects

General Technical Skills: Troubleshooting, problem-solving, technical research, documentation and independent learning

TECHNICAL PROJECTS

Arcade Website

HTML, CSS, JavaScript

- Designed and developed an interactive arcade-themed website as part of Computer Science coursework.
- Used HTML, CSS and JavaScript to create structured, responsive and interactive web pages.
- Applied systematic testing and debugging to identify and resolve technical issues.
- Documented development decisions and evaluated the finished product against requirements.
- Achieved **full marks in Computer Science coursework**.

Game Development

Godot Engine / C#

- Developed games using the Godot engine, applying programming logic and problem-solving skills.
- Implemented and tested game functionality while independently troubleshooting technical issues.
- Developed understanding of object-oriented programming and iterative development.

Personal Portfolio Website

HTML, CSS, JavaScript

- Designed and developed a personal website to showcase technical projects, skills and achievements.
- Focused on clear organisation, usability and effective presentation of technical information.
- Independently researched solutions and refined the website through testing and iteration.

Personal E-Reader Project

- Developed a personal e-reader project combining software development with practical technology and hardware.
 - Researched potential technical solutions and independently investigated problems encountered during development.
 - Developed troubleshooting, research and practical problem-solving skills.
-

EXPERIENCE & LEADERSHIP

Hack Club

Event Organiser, Mentor & Participant | September 2025 – Present

- Support the organisation and delivery of large-scale coding events and hackathons involving young people from different countries.
- Contribute to workshops, virtual sessions and beginner-friendly activities, helping participants overcome programming and technical challenges.
- Collaborate with international teams and external partners to support event planning, communication and logistics.
- Coordinate with people across different teams and time zones, developing organisation and stakeholder-management skills.
- Support participants with technical problems and encourage collaboration in a fast-paced environment.
- Participate in hands-on technical projects and coding challenges to continuously develop programming and problem-solving skills.
- Currently expanding practical technical knowledge into hardware development, including introductory work with PCBs.
- Developed leadership, communication and teamwork skills through organising and supporting technology-focused events.

BAE Systems

Industrial Cadet — Silver Award | November 2024 – December 2024

- Participated in a structured industrial programme gaining insight into engineering, technology and professional working environments.

- Collaborated with a team to design and present an engineering project to industry mentors.
- Used CAD software to design a humanitarian robot, developing practical design and problem-solving skills.
- Applied teamwork and communication skills when presenting ideas and responding to feedback from industry professionals.
- Developed an understanding of engineering processes, innovation and sustainability.
- Successfully achieved the **Industrial Cadet Silver Award** for commitment, creativity and technical achievement.

Wilmott Dixon / EDT

DEC Connect Award — Design a Home for Everyone | December 2023 – February 2024

- Participated in a national architecture and design challenge focused on creating inclusive and sustainable housing.
- Worked collaboratively to develop an accessible home concept addressing different user needs.
- Used digital design tools to develop and communicate design proposals.
- Presented project ideas to industry professionals, including architects and chartered surveyors.
- Visited a Wilmott Dixon housing construction site and gained insight into construction, project management and professional design processes.
- Received the DEC Connect Award for the project.

Jaguar Land Rover

Inclusive Futures: Engineering | December 2023

- Participated in workshops and virtual sessions led by Jaguar Land Rover engineers and industry professionals.
- Explored applications of technology, sustainability and innovation within the automotive industry.
- Developed an understanding of engineering career pathways and real-world STEM applications.
- Engaged with industry professionals through Q&A sessions to explore current engineering challenges.

VOLUNTEERING & MENTORING

Student Mentor | June 2025 – Present

- Support younger students academically and personally, helping them develop confidence and positive study habits.
- Provide guidance with academic work and revision techniques, particularly in Mathematics, Computer Science and Statistics.

- Act as a positive role model and encourage teamwork, responsibility and engagement with school life.
- Develop leadership, empathy and communication skills through regular mentoring sessions and school events.
- Work alongside staff to ensure students receive appropriate support and encouragement.

Independent Tutoring Programme

Volunteer Maths & English Tutor | January 2023 – Present

- Provide one-to-one and small-group Maths and English support to primary pupils and non-native English speakers.
 - Adapt explanations and teaching approaches to suit different abilities and language backgrounds.
 - Help students develop numeracy, language skills and confidence.
 - Developed patience, communication and the ability to explain complex ideas clearly to different audiences.
-

ADDITIONAL SKILLS

Communication & Teamwork

- Confident explaining technical concepts to both technical and non-technical audiences.
- Experienced working collaboratively on technical, academic and design projects.
- Comfortable giving presentations and receiving feedback from peers and industry professionals.

Analytical & Problem Solving

- Use logical reasoning to investigate technical problems and develop solutions.
- Experienced identifying coding errors through systematic testing and debugging.
- Comfortable independently researching unfamiliar technologies and concepts.

Organisation & Initiative

- Manage academic work, technical projects, volunteering and extracurricular responsibilities alongside deadlines.
 - Break larger projects into manageable tasks and milestones.
 - Proactively explore new programming tools, technologies and development techniques.
-

LANGUAGES

- **Urdu:** Reading, writing and speaking
- **Arabic:** Reading and writing; knowledge of Arabic theology, morphology and syntax
